OBJECTIVE:

I am a student studying software engineering at Aptech, learning and practicing web development. I am good at making both static and dynamic websites.

EDUCATION:

- Matriculation | 2021 | National Schooling System.
- Intermediate | 2023 | P.E.C.H.S College.
- Software Engineering Diploma | 2022-Present | Aptech Computer Education

FRONT-END SKILLS:

- HTML
- CSS
- JS
- React JS
- Tailwind CSS
- Bootstrap

BACK-END SKILLS:

- PHP
- C#
- Laravel
- ASP.NET MVC

PROJECTS:

- **1st Semester Project:**
Design a static website with a Home page, Category page, Gallery page, Products page, About page, and Contact page. We build this by using HTML, CSS, and JS.
- **2nd Semester Project:**
Build a dynamic e-commerce website wherein we manage the website through an admin panel. Customers can add items to their cart, purchase products, and engage in Login/Signup processes. We build this using PHP and MySQL.
- **3rd Semester Project:**
Build a dynamic flight booking website in which we manage the site from the admin panel. Customers can add information, book flights, cancel bookings, and log in/signup. We build this using ASP.NET and Microsoft SQL Server.
